Honorable City Council Members:

RE: City Council Priorities - Mills Act Contracts

The processing of Mills Act contracts in the Planning Department has been interrupted for approximately 15 months. The owners of historic property located at Scenic 3 NW of 8th must implement needed maintenance/repairs to the building to maintain it safe and sound . The owners need a Mills Act contract in order to implement the needed repairs; such contract cannot be completed under the current interruption. The owners will appreciate authorization by the Council to process the Mills Act contract application for this property. It will only be an additional planning permit application. Continued lack of needed repairs will result in further deterioration of the structure without a Mills Act contract.

With all due respect,

Luis Osorio on behalf of the property owners.
