

Q1 The City of Carmel-by-the-Sea is considering a permanent change to the landscape lighting within the Ocean Avenue medians. Three (3) lighting options have been installed at select locations between Monte Verde and Junipero. We are seeking your input on which lighting option best compliments the look and feel of Ocean Avenue. Lighting Option #1 is the existing conditions (white string lights) located mid-block between Dolores and San Carlos. Lighting Option #2 is the mini Champagne lights (3 color string lights) located between Dolores and Lincoln (closer to Dolores). Lighting Option #3 is the Designer's Choice option (warm white uplighting) located mid-block between San Carlos and Mission as well as a large specimen tree on the west side of San Carlos intersection (opposite the WWI Memorial Bell). Please vote for the option that you would like to see implemented within the Ocean Avenue medians. Thank you for taking the time to cast your vote!

ANSWER CHOICES	RESPONSES	
Lighting Option #1 - Existing Conditions - White String Lights	31.25%	60
Lighting Option #2 - Mini Champagne Lights - 3 Color String Lights	2.60%	5
Lighting Option #3 - Designer's Choice - Warm White Uplighting	60.42%	116
None of the Above	5.73%	11
