

<b>FINDINGS REQUIRED FOR DESIGN STUDY APPROVAL (CMC 17.64.80 and LUP Policy P1-45)</b>		
For each of the required design study findings listed below, staff has indicated whether the submitted plans support adoption of the findings. For all findings checked "no" the staff report discusses the issues to facilitate the Planning Commission decision-making. Findings checked "yes" may or may not be discussed in the report depending on the issues.		
<b>Municipal Code Finding</b>	<b>YES</b>	<b>NO</b>
1. The project conforms with all zoning standards applicable to the site, or has received appropriate use permits and/or variances consistent with the zoning ordinance.	✓	
2. The project is consistent with the City's design objectives for protection and enhancement of the urbanized forest, open space resources and site design. The project's use of open space, topography, access, trees and vegetation will maintain or establish a continuity of design both on the site and in the public right of way that is characteristic of the neighborhood.	✓	
3. The project avoids complexity using simple/modest building forms, a simple roof plan with a limited number of roof planes and a restrained employment of offsets and appendages that are consistent with neighborhood character yet will not be viewed as repetitive or monotonous within the neighborhood context.	✓	
4. As conditioned, the project is adapted to human scale in the height of its roof, plate lines, eave lines, building forms, and in the size of windows doors and entryways. The development is similar in size, scale, and form to buildings on the immediate block and neighborhood. Its height is compatible with its site and surrounding development and will not present excess mass or bulk to the public or to adjoining properties. Mass of the building relates to the context of other homes in the vicinity.	✓	
5. The project is consistent with the City's objectives for public and private views and will retain a reasonable amount of solar access for neighboring sites. Through the placement, location and size of windows, doors and balconies the design respects the rights to reasonable privacy on adjoining sites.	✓	
6. The design concept is consistent with the goals, objectives and policies related to residential design in the general plan.	✓	
7. The development does not require removal of any significant trees unless necessary to provide a viable economic use of the property or protect public health and safety. All buildings are setback a minimum of 6 feet from significant trees unless otherwise agreed upon by the City Forester.	✓	
8. The proposed architectural style and detailing are simple and restrained in character, consistent and well integrated throughout the building and complementary to the neighborhood without appearing monotonous or repetitive in context with designs on nearby sites.	✓	
9. The proposed exterior materials and their application rely on natural materials and the overall design will add to the variety and diversity along the streetscape.	✓	

10. Design elements such as stonework, skylights, windows, doors, chimneys and garages are consistent with the adopted Design Guidelines and will complement the character of the structure and the neighborhood.	✓	
11. Proposed landscaping, paving treatments, fences and walls are carefully designed to complement the urbanized forest, the approved site design, adjacent sites, and the public right of way. The design will reinforce a sense of visual continuity along the street.	✓	
12. Any deviations from the Design Guidelines are considered minor and reasonably relate to good design principles and specific site conditions.	✓	

**COASTAL DEVELOPMENT FINDINGS (CMC 17.64.010.B.1):**

1. Local Coastal Program Consistency: The project conforms to the certified Local Coastal Program of the City of Carmel-by-the Sea.	✓	
2. Public access policy consistency: The project is not located between the first public road and the sea, and therefore, no review is required for potential public access.	✓	

**General Findings Required for All Use Permits (CMC 17.64.010):**

1.The proposed use is not in conflict with the City's General Plan.	✓	
2.The proposed project, as conditioned, will comply with all zoning standards applicable to the use and zoning district.	✓	
3. The granting of the Use Permit will not set a precedent for the approval of similar uses whose incremental effect will be detrimental to the City, or will be in conflict with the General Plan.	✓	
4.The proposed project will not make excessive demands on the provision of public services, including water supply, sewer capacity, energy supply, communication facilities, police protection, street capacity and fire protection.	✓	
5.The proposed project will not be injurious to public health, safety or welfare and provides adequate ingress and egress.	✓	
6.The proposed project will be compatible with surrounding land uses and will not conflict with the purpose established for the district within which it will be located.	✓	
7.The proposed project will not generate adverse impacts affecting health, safety, or welfare of neighboring properties or uses.	✓
