Subject: Letter to Commission

Dear Sara,

Below is the letter I like to submit to the commission before the meeting. It is also addressed to you as well. I appreciate all the assistance from you on this matter and I hope we will have a good outcome. I will call in according to the instructions you have provided to me.

All the best,
Sanya Micovic

Dear Ms. Davis and Commission members :

My name is Sanya Micovic owner of 7 Dolores SW of 13th house which is under construction.

I want to make a statement regarding the roots of 2 trees on my property which have been disturbed during the course of the site work and offer my sincere apology as this was done unintentionally.

My general contractor had to leave the project due to the severe heart condition and we were willing to release him from the project. At the time most of the major construction was completed. We were left to complete the interior finishes and landscape which we felt we could manage on our own, with some help with scheduling from another contractor.

As the shutdown during the pandemic pushed us back and many of subcontractors were very backed up, the work on the house has slowed down substantially and has caused numerous delays.

We own retail business in Carmel which was closed during the shut down until June 1st. Without an income and having to complete the building of the house, this has created great financial burden on us. We were trying to overlook the construction as well as to work in the business to generate the income after we reopened.

We were not aware that the workers made this mistake with the trees until the forester brought it to my attention, which has devastated me. Apparently the worker misunderstood the instructions and has mistakenly disturbed few roots.

We love this property, we love our trees, we purchased this house because of those trees which are like sculptures in the garden and any thought of them being damaged in any way had been emotionally very difficult.

My husband has resided in Carmel for 40 years and I for 28y. We have our business in town for past 28 years and we try to contribute to our beautiful community as much as we can. We love nature and our community and we will do everything possible to make it even more beautiful.

We are hoping for your consideration and understanding in reviewing this matter.

Thank you for your time.

Sincerely

Jovan and Sanya Micovic
