Hello Brandon and planning commission,

We received a copy of the latest plans for Ulrika Plaza. We think the designs look wonderful and will fit in wonderfully with our city's current architecture.

We anticipate it will be approved. It is not that we need to get on with this project, so approve it regardless. It's about the fact that providing the owner follows the ordinances, he has much discretion on the design. He will not be able to build something that each person finds personally appealing.

Thank you kindly,

Cari and Chris White
