**Subject:** **Ulrika Plaza**

Good morning gentlemen. Director Swanson, I am a San Diego resident who had emailed you previously relative to the creeping architectural changes that we and our local friends here have been observing on our regular vacays to Carmel. My outreach today is specific to the Ulrika Plaza project. It appears to me that you, and the Board, have been sensitive, receptive and responsive to your community relative to the ultimate look, feel and experience that this plaza will provide. I applaud you all for this and for your patience – the job is not an easy one! I am familiar with the current design and agree – this will be a lovely and culturally homogeneous addition to Carmel. I do urge you and the Board to proceed with the undertaking as quickly as possible. Clearly the vast majority of the community not only endorses this effort; but is desperately anxious to add this gem to the local landscape in place of the unsightly “Pit”. We vacationers down here look forward to visiting this new addition to the city!

Sincere thanks for your time, efforts and consideration.
